Top Skills

Agentic AI Development
Retrieval-Augmented Generation (RAG)
Application Programming Interfaces (API)

Languages

Hindi (Native or Bilingual)
German (Elementary)
English (Professional Working)

Certifications

Machine Learning Specialization
Scientific Computing with Python
Mathematics for Machine Learning and Data Science Specialization
IBM Data Science
Machine Learning A-Z: AI Python & R + ChatGPT Bonus

Chaitanya Jindal

AI Systems Engineer | GraphRAG · Agentic AI · Computer Vision · MLOps | Building production ML Systems
Noida, Uttar Pradesh, India

Summary

I build AI systems that ship, not notebooks that score well in isolation and never see production. My work sits at the intersection of GenAI/Retrieval Systems, Computer Vision, and Production ML Infrastructure. Currently completing the PG Certificate Programme in AI at CDAC Noida (AIR 286, CCAT 2026), a 1200-hour full-time program covering deep learning, NLP, and MLOps. My capstone, GraphRegAI, is a hybrid GraphRAG platform for regulatory intelligence: it combines Neo4j knowledge graphs with Qdrant vector retrieval (BGE-M3 embeddings) to produce auditable, source-grounded answers, built on LlamaIndex and FastAPI, containerized with Docker. Before CDAC, I spent 2023 building ML foundations independently (DeepLearning.AI, IBM, University of Washington, Google) alongside my B.Tech, then joined Droisys : first as an AI Intern, later as an Associate Data Analyst, where I: • Built a semi-automatic annotation toolkit (SIFT/FLANN feature matching) that cut manual labeling effort by 60% • Engineered a YOLO11 + OpenCV cropping pipeline that reduced dataset preparation time by 40% • Designed data validation pipelines to guarantee production-grade quality for downstream CV models I also ship the tools I build CropVision and QuickDraw are working desktop applications used for real annotation and dataset workflows, not demos. Currently deepening: Agentic AI Design Patterns, LLMOps, and Cloud-Native ML Deployment. Open to: Machine Learning Engineer / AI Engineer / Computer Vision Engineer roles. Feel free to connect or reach out.

Experience

Droisys

Associate Data Analyst

April 2025 - February 2026 (11 months)

Noida

- Designed and shipped a Python-based "Auto-Annotator" toolkit using localized template matching, replacing a largely manual labeling process and cutting that effort by 60%, freeing up the team for higher-level dataset curation.
- Built an image cropping pipeline on YOLO11 + OpenCV that shortened dataset preparation turnaround by 40% and removed a recurring production bottleneck.
- Designed data validation and preprocessing pipelines using Pandas to sanitize large-scale datasets and ensure production-grade data quality.
- Engineered automation tools to streamline ML data workflows and eliminate repetitive manual processes.
- Contributed to building scalable dataset engineering solutions for Computer Vision pipelines.

Droisys

AI Intern

January 2024 - May 2024 (5 months)

Noida

- Researched and implemented computer vision algorithms for image quality enhancement and low-light object detection on real-time edge devices.
- Built and maintained server-side Python scripts for data pipeline orchestration and preprocessing.
- Designed a collaborative recommendation web platform using Django, implementing collaborative filtering-based scoring with RESTful APIs for real-time data ingestion and analytics dashboards.

Tenacious

General Secretary

April 2023 - May 2024 (1 year 2 months)

Noida

- Led a technical club, coordinating workshops, competitions, and inter-department events, built leadership, event management, and cross-team communication skills alongside the technical coursework.

Amazon

Mentee Amazon ML Summer School

September 2023 - October 2023 (2 months)

- Selected for Amazon's competitive ML Summer School programme, gaining hands-on exposure to applied ML techniques across supervised learning, deep learning, and probabilistic modelling.

Education

Centre for Development of Advanced Computing (C-DAC)
Post Graduate Certificate Program, Artificial Intelligence · (February 2026 - August 2026)

JSS ACADEMY OF TECHNICAL EDUCATION, NOIDA
Bachelor of Technology - BTech, Computer Science · (November 2020 - November 2025)

The Adhyayan School
High School/Secondary Diplomas and Certificates · (2013 - 2020)
